Experience

Junior Software Engineer (Independent) | Plato Alpha

August 2022 - Present

- Designed, developed, and maintained complex web applications for clients using Laravel and React.
- Provided exceptional application support, resulting in high client satisfaction ratings.
- Implemented custom features, including a delivery notification system with WhatsApp integration and targeted database queries, improving the overall user experience.
- Built and maintained multiple Wordpress sites for non-profit organizations, contributing to their online presence and digital marketing efforts

Software Engineer (Intern) | Plato Alpha

July 2022 - August 2022

- Led a small intern team in redesigning the Plato Alpha website, resulting in a modern and user-friendly design.
- Coordinated with the front-end team to produce the website within the internship period and exceed project expectations.
- Utilized Laravel to create a headless CMS, providing a seamless backend experience for the website's content creators.
- Implemented features for creating blogs, new users, and case studies, improving the website's functionality and engagement.

Junior Software Developer (Contract) | Bahamas First

August 2021 - July 2022

- Streamlined the product build process by documenting the initial setup and automating manual tasks with front-end programming.
- Designed and deployed the front-end using Microsoft Excel and JavaScript, resulting in improved form validations and user experience.
- Developed digital products in the Development environment with Excel and Visual Basic, increasing efficiency and accuracy.
- Provided valuable insights and suggestions to business analysts, resulting in smoother data capture and digital product development processes

Software Developer (Intern) | Bahamas First

May 2021 - August 2021

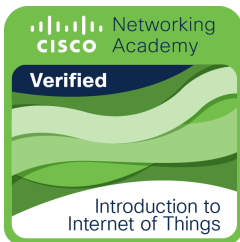

- Collaborated with a team of developers to build high-quality digital products, leveraging agile methodologies and industry best

Certifications

practices.

- Analyzed and translated business analyst specifications into efficient and logical workflow, contributing to the successful delivery of projects.
- Developed digital products within a Development server, gaining experience with backend software tools such as Pure Work Manager

Kitchen Helper/Cook | Iron Grill

September 2019 - August 2020

- Assisted in the preparation of a variety of dishes in a fast-paced kitchen environment as part of a small two-man team.
- Demonstrated strong attention to detail and adherence to food safety guidelines to ensure high-quality dishes were served to customers.
- Assisted with inventory management and ordering of kitchen supplies to ensure that the kitchen was well-stocked at all times.
- Demonstrated excellent multitasking skills by handling cash, making deliveries to businesses and handling customer complaints while maintaining a clean and sanitized kitchen work space.
- Demonstrated strong communication skills and the ability to work well in a team in order to create a positive and productive work environment.
